## About Lean Six Sigma

Nothing compares to the effectiveness of Lean Six Sigma when it comes to improving a company's operational efficiency, raising its productivity, and lowering its costs. It improves design processes, gets products to market faster with fewer defects, and builds customer loyalty.

## Value Stream Mapping (VSM) training

Based in Sheffield, United Kingdom, lean6-sigma operates across the UK and throughout the world. I have worked across several industries, high profile clients include Shell (Finance Operations), Syngenta, Sanofi and HSS Hire.

At lean6-sigma we focus on the 'how' not the 'why'. By drawing on service and manufacturing case studies, we are able to bring complex, often daunting, subjects to life. At lean 6-sigma, we believe that the most effective way to impart knowledge is to learn by doing - our courses are practical, hands-on and fun.

Wherever there is value, there is a value stream; the challenge lies in seeing it. By understanding customer requirements, lean process produce what customers' want, when they want it. But how do you specify 'value' in the customer's eyes? And how do you know which processes add value? The answer lies in understanding the value stream and having undertaken a Value Stream Mapping exercise, you can shape your processes to produce in accordance with TAKT - the rate at which the customer wants delivery of their product or service. This one day course aims to introduce the first three principles of Lean, (specify value, assess the value stream and create flow). Our highly practical and interactive course starts with a process that is cumbersome and making a loss - yet we end up with a process that is flexible and profit-making.

## Completing your VSM Certification

Vocational project applied to your business

1

Apply the tools to make individuals competent

2

Demonstrate effective change using Lean6sigma

3

## 2018 Courses

Dates 6 Feb, Sheffield

1 May, Jersey,

3 Jul, London

Price £235

### Your Trainer

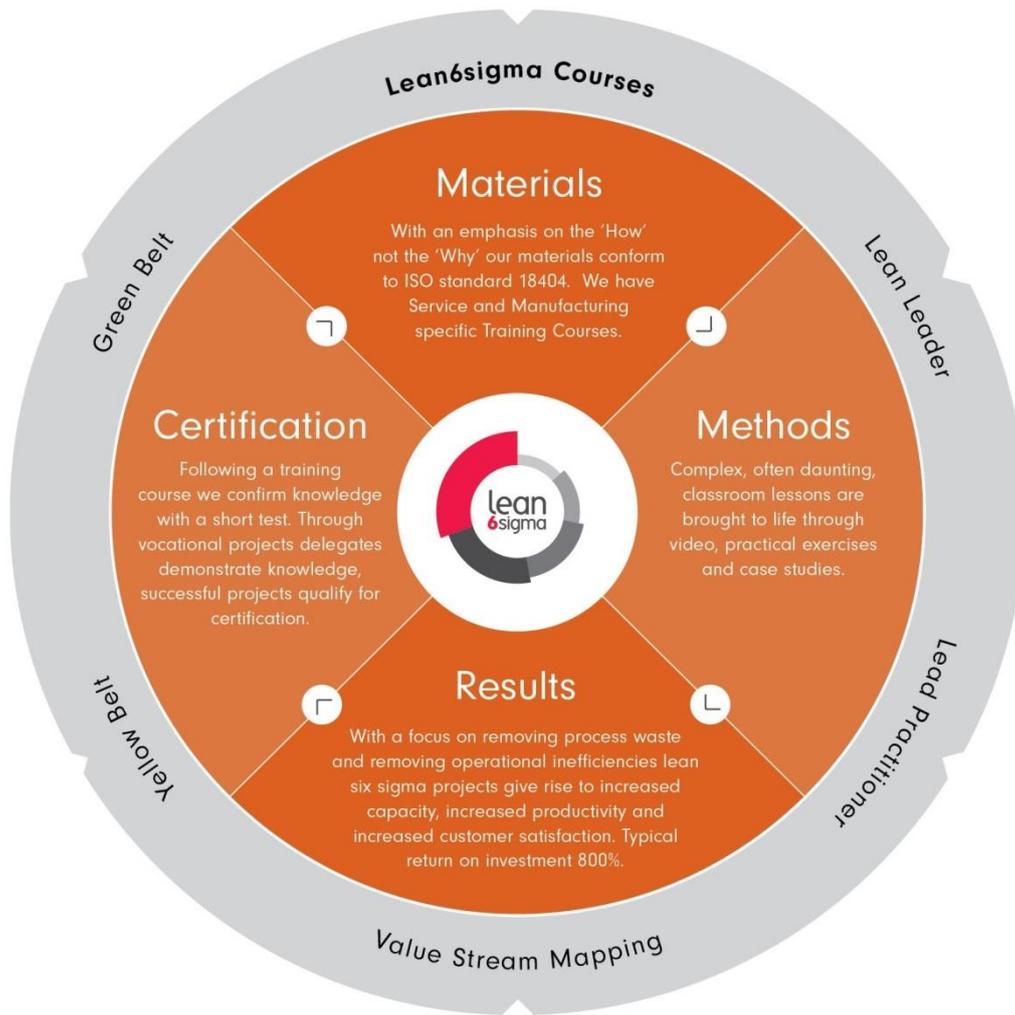

Chris Kinvig

Your Lean six sigma consultant with 15 years experience in lean-six-sigma, who has trained and coached over 500 belts. Chris was part of the team responsible for implementing lean-six-sigma into Shell (Finance Operations), and at Bosch he held cradle-to-grave responsibility for implementing Lean.

Typical return on investment

## Course structure

## Why do this course

Value Stream Mapping helps to identify bottleneck processes, it highlights which steps add no value to the customer and by designing the future state 'Value Stream Design' sets the lean deployment roadmap. This course will help you identify improvement opportunities across your organisation.

**65% increase in profit**

## What our clients say

I was amazed at how powerful Value Stream Mapping was. In the space of a few hours we knew where the opportunities for improvement were and we were able to prioritise our improvement activities.
